HUAWEI Ascend Mate2

Quick Start Guide

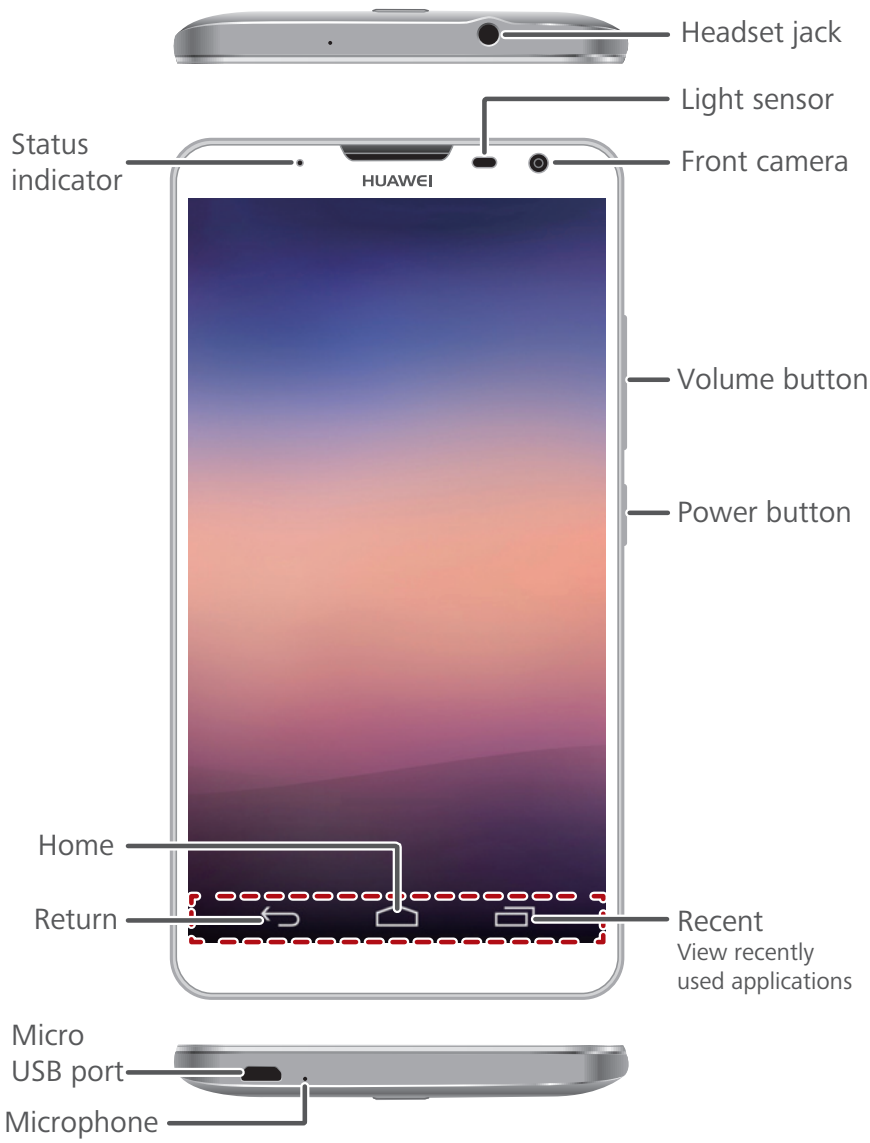
HUAWEI

Your phone at a glance

Thank you for choosing **HUAWEI Ascend Mate2**.

Before you start, let's take a look at your new phone.

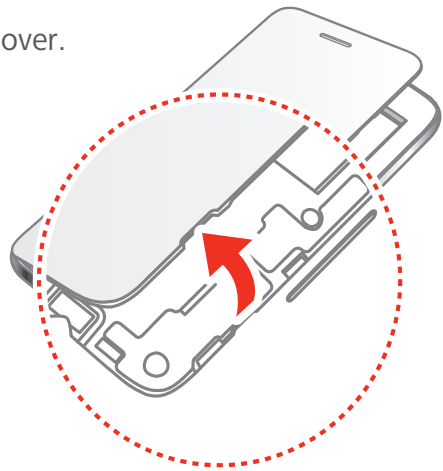
Press the power button to turn on or turn off the screen.



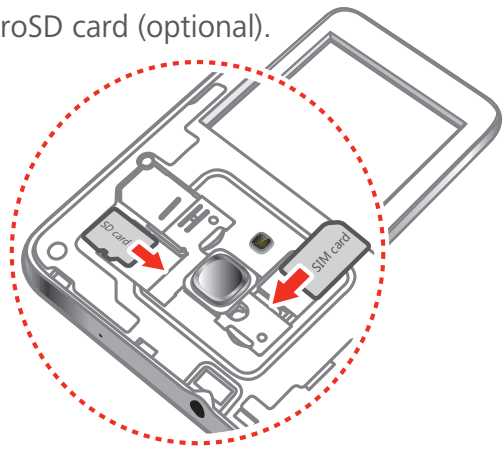
Installing the micro-SIM card

Follow the instructions in the figures below to install your micro-SIM card and microSD card. Then press and hold the power button to power on your phone. Do not insert or remove the micro-SIM card when your phone is powered on.

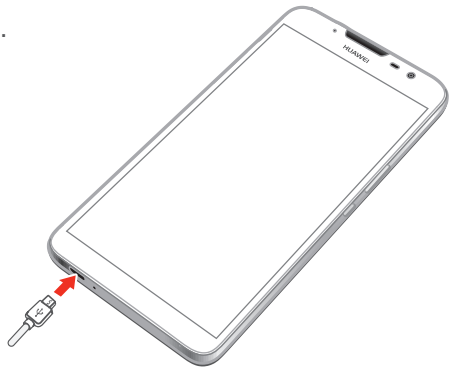
1 Open the battery cover.



2 Insert the micro-SIM card.
Insert the microSD card (optional).



3 Charge the phone.



Locking and unlocking the screen

Press the power button to lock the screen.

Your phone automatically locks its screen after being idle for a specified period of time. You can touch > **Display** > **Sleep** to set the screen timeout period.

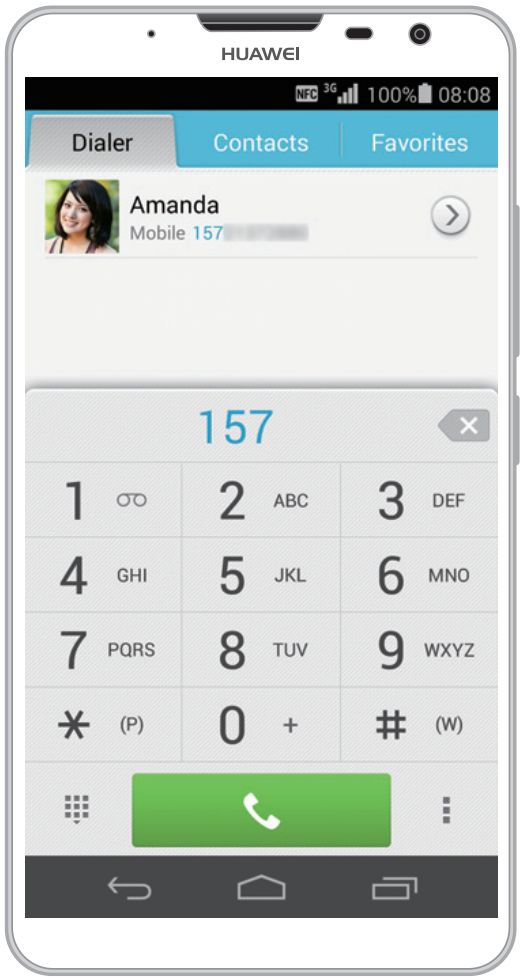
If the screen is off, press the power button to turn it on. Slide your finger toward any direction to unlock the screen.

Calling

Touch and enter a phone number on the dialer. Your phone then displays matching contacts. Touch a contact to place a call.

Alternatively, touch and enter the initials or first few letters of a contact's name to quickly find the contact. From the displayed matching contacts, touch the contact you want to call.

You can also touch a number from Messaging, Email, or Browser to place a call.

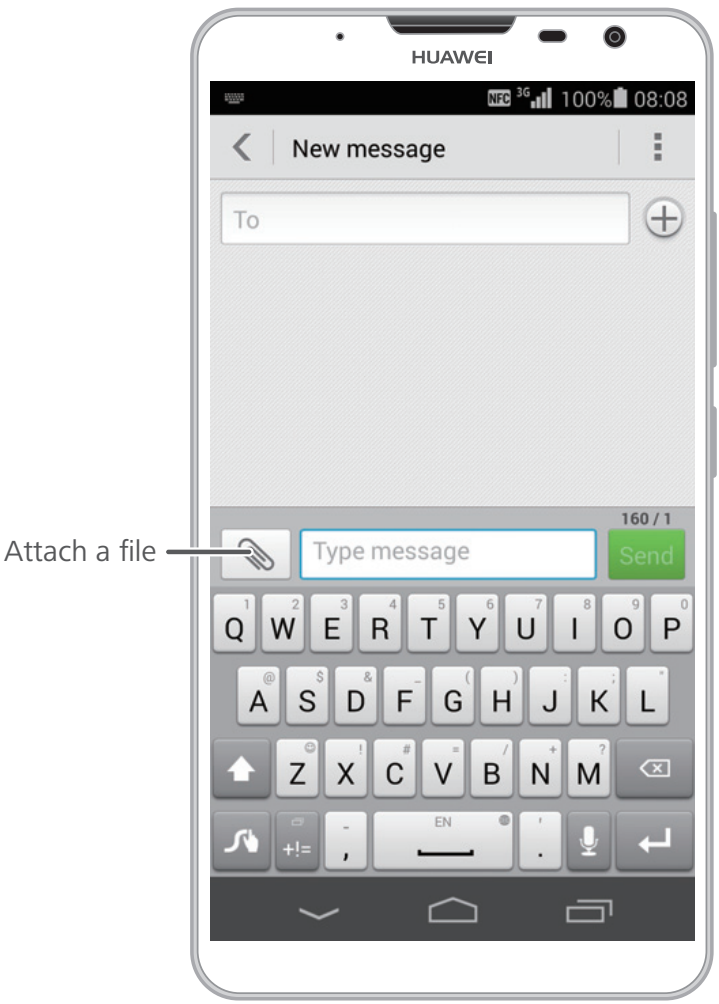


Messaging

Touch to open **Messaging**.

Attaching a file to a text message converts the message into a multimedia message. You can save photos, audio clips, or videos from received multimedia messages.

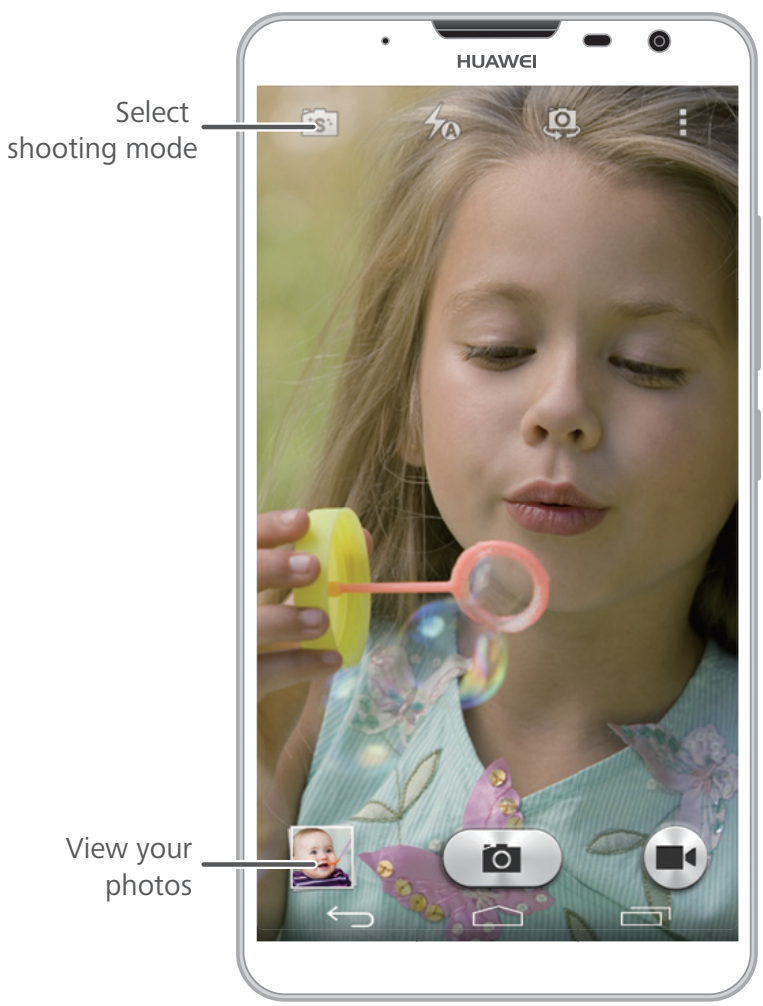
When you are typing, flick down from the status bar to open the notification panel, and touch to switch the input method.



Camera

Touch to launch **Camera**.

Frame the scene you want to capture, and have the phone automatically focus itself or touch the screen to focus on a specific object. Touch to take a photo or touch to shoot a video.

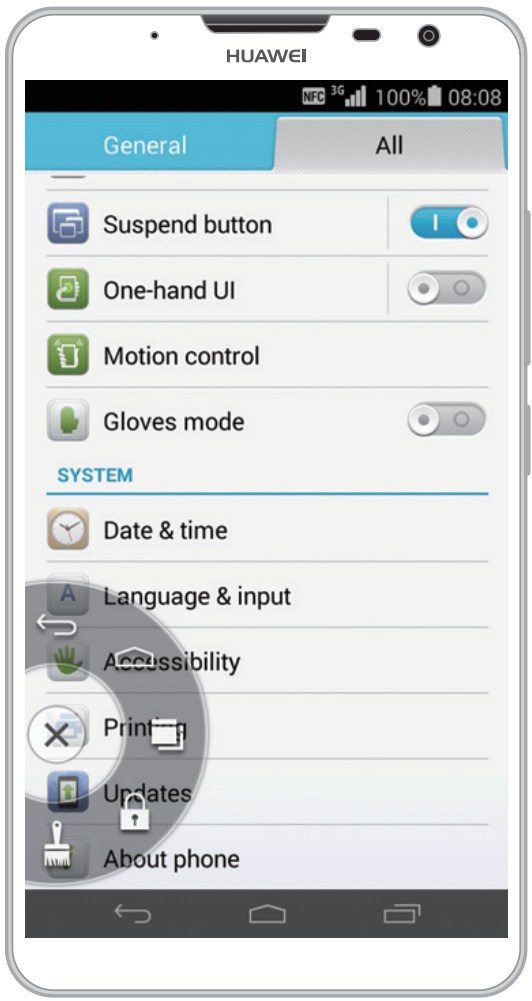


Suspend button

The suspend button contains a variety of useful functions and shortcuts, which lets you quickly configure your phone settings or launch applications.

Go to and touch **Suspend button** to turn on the suspend button. Touch to display the suspend button menu.

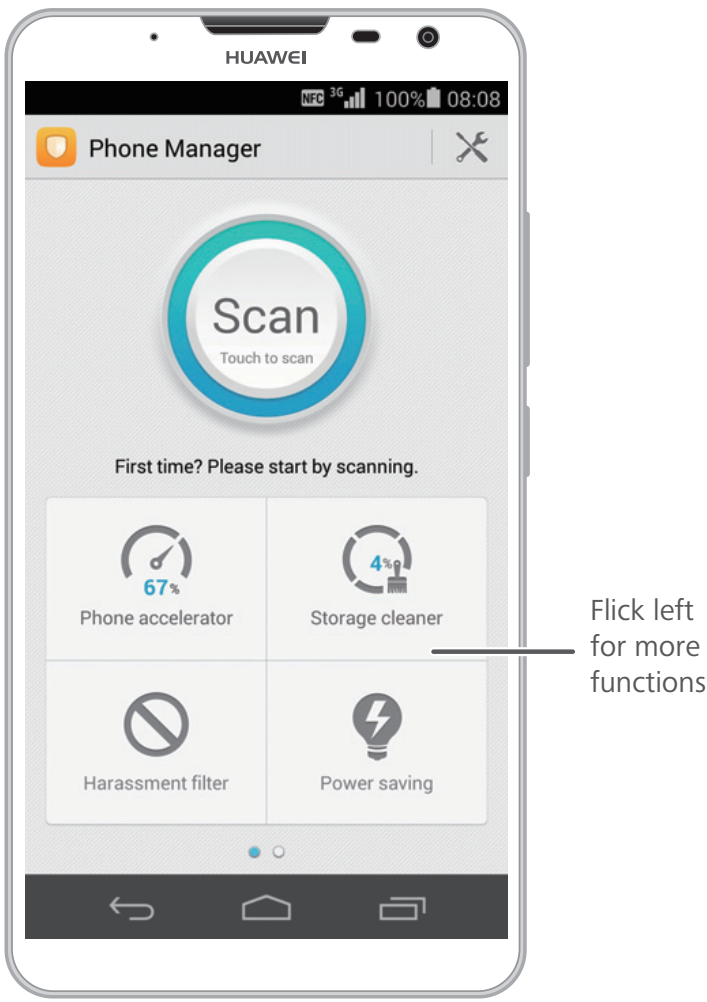
Touch to display the multi-window menu. You can then launch commonly used tools without leaving the current screen.



Phone Manager

Phone Manager can help you manage application permissions, optimize the system, clean up your storage, and save battery power.

Touch to open **Phone Manager**.



Multi-screen display

You can connect your phone to other displays to synchronize content on your phone to those displays and control the playback.

Open the notification panel and turn on Multi-screen by touching . You can then display photos or play videos and audio clips from your phone on a TV or projector. To do so requires that your TV support DLNA. If it doesn't, you can purchase the HUAWEI MediaQ or a similar wireless transmission device.
